

## The SunFinish® Wood Floor Finishing System

Lets you use your floors immediately after refinishing. Unlike traditional coatings, there is no lengthy cure time involved. Coatings cured with light are everywhere in society, from UV drying of nail polish to fillings at the dentists' office. Factories have been taking advantage of this technology for over 40 years. For the first time ever, this process is being offered to business owners refinishing their floors.

## THE FUTURE OF WOOD FLOOR REFINISHING HAS ARRIVED.

Cured with UV light, the SunFinish® Wood Floor Finishing System offers cutting edge technology that promises durability and sustainability. Imagine, beautiful wood floors with the ability to return to your busy life just moments after application.

TO BUSINESS  
OWNERS  
REFINISHING  
THEIR FLOORS.**

#### **CUTTING EDGE TECHNOLOGY**

**SunFinish®** topcoats have superior chemical and stain resistance to virtually any other coating on the market. Mustard, red wine, and many powerful solvents have little to no effect.

#### **DURABLE**

**SunFinish®** wood coatings are waterborne, and harden immediately with UV light. They contain near-zero VOCs, no hazardous air pollutants, and are non-flammable.

#### **INNOVATIVE & SUSTAINABLE**

**SunFinish®** wood coatings are extremely durable and offer a long lasting finish at any gloss level. They offer better scratch resistance than many traditional coatings.

#### **FAST**

**SunFinish®** wood coatings allow full use of your floor immediately after refinishing and are rug ready as soon as the coating is cured with ultraviolet light.

The SunFinish® instant refinishing process can also be used on table tops and bars! Ask your applicator for details.
